Additional Guidelines and Clarifications

Option Information:

1. A Barrier/Interior Point solver that provides an alternative method of solving linear models that may be faster than the linear solvers included in the Base version. For LINDO API and LINGO, the Barrier solver also provides a means of solving Quadratic and Quadratically constrained models.
2. A GRG based solver capable of finding locally optimal solutions to general nonlinear models.
3. A multistart and guaranteed global solver capable of finding globally optimal solutions to nonlinear models. This option requires the Nonlinear option (see 2 above).
